planarity of the switch

backlit gem /
light blue for

Opaline white for white controls.

The AXIAL control

The axial control characterizes the design of the line. It ensures perfect planarity of the switch thanks to an advanced technology, synthesis of an extremely precise and sophisticated mechanical construction.

SWITCH FEATURES

Sweet click control
Electronic control, giving the
perception of a digital device, also in
traditional type systems.

ROCKER SWITCH

Traditional choice, is the
ideal continuation of BTicino
wiring devices offer.

NEW AXIAL CONTROLS

REDUCED depth,
SUPERIOR ergonomics

THE THINNEST EVER.

The new axial control takes up the least space in the box: - **30% the size of the old axial**

- It is easy to install, in new systems and in refurbishments even **with boxes full of cables**
- it is perfect for installation with ultrathin cover plates and lower (Axolute and Livinglight) AIR supports

Surface-mounted

E.g. screw/plate in low AIR support version

Ergonomic

The performance features of the new axial controls send sensations similar to the activation of an electronic control.

- **Reduction in the travel** for activation - **35%** (2.2 mm instead of 3.5 mm)
- **Reduction in the strength** required for the activation - **40%** (5N instead of 8/9N)
- **Reduction in the perceived** noise: **-18%**
- Optional backlighting with the **new LEDs**

Universal: maximum performance

The new controls – 10 AX Mini Gap (contact distance reduced to 1.8 mm) – are suitable for all types of lamps **by controlling loads up to 2,500 W** and improving performance even in potentially critical situations (e.g. LED strips).

Brightness	220 +	400 +	700 +	900 +	1300 +

Standard	25 W	40 W	60 W	75 W	100 W

Table showing the type of lamp in relation to the relative load according to the brightness produced.

NOTE: The new axial controls make it possible to check loads up to 2,500 W (so 16AX are no longer necessary).

NEW FLAT SOCKET

Beautiful, practical and safe

The **new FLAT sockets**, German/Italian and French/Belgium standard (10/16 Amperes) compliant, **feature a moving front plate** that moves inwards when the plug is inserted.

This feature ensures:

- perfect planarity of the light point also with the German/Italian standard sockets, adding value to the installation, which will perfectly match

- the sophisticated and prestigious standards of AIR Axolute and LivingLight
 - more practicality because the easy to see holes make inserting the plug easy.
- It also perfectly adapts to all types of sockets used in Italy (C, L, F type with straight or 90° cable).
- more cleanliness because dust and grease do not accumulate inside the sockets.

Features

- Body aligned with the controls and the cover plate.
- Movable wall aligned with the body . It goes in when the plug is inserted and realigns when the plug is taken out.
- Earth contacts always protected for greater safety.

LED backlighting of the holes

Appropriate housings at the bottom of the enclosure ensure easy LED wiring. The LED is optional and is available in 4 colours: white, blue, green, orange.

MORE SAFETY

The **FLAT** socket guarantees more safety and protection than all the other sockets on the market thanks to:

- greater distance between movable wall and contacts when the plug is not inserted (the movable wall only lowers when the plug is plugged in)
- safety system which prevents people putting foreign objects into the plug entrance holes
- the movable wall returns to its original position on removing the plug, thus activating the safety system
- earth contacts always protected.

NEW TV SOCKETS

A simple range for advanced performances

OPTIMUM PERFORMANCES AND CONFORMITY

Low attenuation, optimised over the requirements of the EN50083-4 standard (<1 dB in DVBT and Satellite Band). Suitable also for the new television devices in UHD (Ultra High Definition). Reduction of the amplification required for the operation.

All new TV sockets comply with European reference standards (EN 50083-2, EN 50083-4)

Only one code for each TV socket

Simplification: for all the TV sockets, the aesthetic covers are supplied with the engine.

New wiring system

- The new wiring system of the TV sockets allows an intuitive connection thanks to the complete opening of the clamp and the direct display of the cable insertion zone.
- Improved efficiency thanks to the clamp shielding in Class A (protection 4G; LTE ready).

Selection guide

SIMPLY select the function (e.g. direct socket, through socket, satellite socket, etc.), without having to worry about the colour of the mechanisms: for the white, Tech or anthracite versions, **the code is always the same!**

A complete range

The new TV sockets offer is perfectly suitable for different installation modes of a TV system (single home or apartment block) and for the different wiring modes (star or passthrough installations).

* SCREWLESS TERMINALS CAGE CLAMP®S: WIRING EXCELLENCE

Innovative automatic terminal for rigid and flexible cables.
 The constant pressure on the cables guarantees optimal long-lasting contact: the problem concerning the half turn on the screw terminals is definitely solved.

- Simple and quick cabling: you just need to strip the cable and insert it directly into the terminal.
- Using a screwdriver for the opening will prevent accidental releases in boxes full of cables.

The two independent springs of the terminal guarantee a perfect grip for cables with different diameters, up to 2.5 mm²

Example of cabling with rigid cable

After stripping the cable, put it directly into the terminal Use a screwdriver to pull out the cable

▶ CAGE CLAMP®S is a registered trademark of **WAGO** Kontakttechnik GmbH, Germany!

Before inserting the LED, detach the plastic tab and install the socket on the support.

CONNECTED THERMOSTAT

○ X8000

The Smarter connected thermostat, together with the dedicated Thermostat APP, is a device which allows you to adjust and monitor the temperature in the rooms precisely and accurately; all the programming and most of the functions are performed simply and intuitively using the APP.

Thanks to its Wi-Fi connection, Smarter can be programmed and controlled remotely; it can also display the temperature and humidity measured in the room.

The temperature level can be set locally for manual operation and the Boost mode can be activated. The Boost forces the switching on of the system for a limited time (30, 60 or 90 minutes) independent of the measured and programmed temperature.

- Power supply 110 to 240 Vac , 50/60 Hz;
- 2 W max absorption;
- 1 x 1.5mm² maximum cable section;
- Operating temperature 5 to 40 °C;
- Temperature set-point 5 to 40 °C;
- Increase of 0,5 °C;
- 1-contact output in switching free of 5(2)A potential.
- Type of operation 1BU
- Pollution index 2
- Rated pulse voltage 4 kV
- Wireless device in compliance with 802.11b/g/n standard, frequency 2.4 - 2.4835 GHz, transmission power < 20 dBm. WPA/WPA2 safety protocol.

Installation:

- flush mounted, on boxes item 503E or 500 (for item 500 use the wall dowels)
- plasterboard, on boxes item PB503N and PB502N

○ X8000W

DIAGRAM FOR THE USE OF THE GREEN SWITCH, ITEM L/N/NT4658N

ECO MODE

Manual load activation and automatic switch off managed by the dimmer/actuator based on the detection of the presence of people and the desired level of illumination detected by the control, item L4658N. The function of the control is first of all to activate the automatism of the dimmer/actuator: upon first pressure, the sensor compares the desired light level with the actual light level of the room, and ascertains if the light should be switched on or not. A subsequent pressure of the control forces the switching ON or OFF of the automatism determined by the dimmer/actuator.

- 3) The transformer must be loaded at its rated power, or in any case never below 90% of its rated power. It will be preferable to use a single transformer, rather than several transformers in parallel. For example, it will be preferable to use one single 250 VA transformer with 5 x 50 W spotlights connected, rather than using 5 x 50 VA transformers in parallel, with one 50 W spotlight each.

Matt white cover plate that can be painted

Before painting the matt white - AW cover plate

After Painting The Cover Plate

SUGGESTIONS FOR USE

The MATT WHITE cover plate can also be painted.

PAINTING

The matt white paint of the cover plates - **AW** - can be used as a primer. Before painting with house paint, the surface should be sanded/matted for better adhesion. Resin-rich products (e.g. water-based varnishes) should be used.

Notes

- Do not paint the devices (keys, sockets, etc.)
- Paint the cover plate separately and mount it when it is dry

CLEANING THE COVER PLATE

Water-based detergents should be used. Using ethyl alcohol or other solvents which could damage or soften the paint is not recommended.

Art. H4802KY

Note: Use the tool with suction cups item H4892KY to remove the installed cover plates
