High Performance for the Future

*Premium Line
Your Professional Partner of Structured Cabling System*

Premium-Line Systems GmbH is a part of a global manufacturing group with more than 20 years of experience on the field of networking market. Premium Line system is a comprehensive solution for the network infrastructure, mainly designed in Europe, with a complete product portfolio including classical and advanced copper solutions, outside plant and premises fiber optic solutions, datacenter server cabinets.

Since the beginning of the nineties we have been devoted to researching and developing the modern signal transmission cable and the joint hardware. Through almost twenty years of efforts, we succeeded in developing high performance tested network transmission products. It is a matter of course that our team of professional designers attends to all specific inquiries from our customers worldwide.

Category 6A+, Category 6A, Category 6 & 5e Premium Line Cabling System

delivers end-to-end solution for converged networks with high flexibility and proven interoperability to ensure smooth deployment and simplified management. Professional design and advanced leading processes supported by large manufacturing capacities evoke the products to be in great demand.

New products development and constant process improvement are two key approaches to maintain the company's competitiveness. All Premium Line cabling systems installed by an authorized Premium Line installer or by a System Center are backed by a 25-year warranty.

This warranty provides each end user the confidence of a future-proofed system. In time of high data transmissions and growing demand on bandwidth parameters a proofed networking infrastructure system becomes a must. With Premium Line you can afford this.

Integrated Strength of Manufacture & System Integrator

Premium Line owns over 20 years experience in developing and manufacturing of data cabling products; and also the experience of marketing and promoting under its own brand – "Premium Line". With this strength, also the complete range product series for data communication cabling use, these keeping us in the leading edge over worldwide market. Till today, we've successfully cooperated with our certified team accomplished over hundreds of projects over the world.

Quality & Service

Premium Line has dedicated teams responsible for internal quality monitoring and products systemic upgrading, and also responsible for customer quality & technical support and service maintenance.

All products are verified at the input of raw material and constantly monitored until the production process is finished. Based on the newest international standards plus our valid ISO-Certificate plus covering the physically basis "ROHS compliant" assurance, we are able to build up a complete quality & services policy and also the promise of best possible performance.

25 Years System Warranty Policy

All Premium Line supplied copper and optical cabling systems, which are installed and tested by an authorized Premium Line installer in accordance with Premium Line Cabling System installation manual, will be applied to 25 years warranty. Premium Line has a complete channel program for distributor authorization, installer courses, warranty publishing, marketing & technical service, worldwide strategy and information sharing. This is uniting our strength to activate our global sales expanding and all your prosperity in cabling business.

Our Advantages

- 25 Years System Warranty – Guarantee all data network system for 25 years which consists of Premium Line products
- Cabling training and Certificate course
- Dedicated R&D team for new products design
- Professional sales team for worldwide marketing guidance
- Plant based Product Management & logistic team for technique, quality and shipment support

Access to High Speed Ethernet Category 6A⁺ Cabling Solutions

Premium Line CATEGORY 6A⁺ CABLING SOLUTIONS

10G Standard

2006, standard IEEE 802.3an is ratified to provide 10 Gbit/s connections over unshielded or shielded twisted pair cables, and specified transmission characteristics up to 500MHz.

This requires Category 6A or better balanced twisted pair cables comply with ISO 11801 amendment 2 or ANSI/TIA-568-C.2 to support 10GBASE-T up to distances of 100m.

So far, 10G BASE-T Ethernet is the fastest LAN connection path over copper communication solutions.

10G Bandwidth

10G BASE-T system requires the cable works as full duplex mode, which means use 4 pairs for simultaneous transmission in both directions, and to support 100m data transmission, it must use Category 6A 500MHz at a minimum.

Premium Line Category 6A⁺ 1000MHz communication cable, with the significant higher bandwidth to provide bigger quantity of "data path", definitely guarantees you stable and excellent practical 10G network and capable to support higher speed application.

For the future building data network upgrade, Premium Line 1000MHz cable is special design to assure the bandwidth to be compatible with the faster and faster network change and development. And it will be also make the system upgrade project easy and comfortable as only need to change the module of both side for the permanent links.

"MADE IN GERMANY" Solution

As Europe now is leading edge of 10G shielded solutions, Premium Line Systems GmbH combine strength of own experienced R&D team and special know-how market wise to provide a **MADE IN GERMANY** Category 6A⁺ shielded solution. High quality assurance as always the German quality products perform!

Keystone Jack

Category 6A+ 180° Shielded Die-casting Keystone Jack, De-embedded Type

To fully support Class EA link for 10G applications, Premium Line Category 6A+ shielded keystone jack achieves de-embedded performance definition according to ISO/IEC 11801:2011(Edition2.2). The module is in toolless design for quick operation and also upgrades its construction for easy-install. And T568A&B wiring methods are both available.

- Real ISO/IEC 11801 compliant module
- All condition excellent performance to support your LAN access
- Easy and quick installation, reliable contact & connectivity
- Standard RJ45 socket with springs for loop grounding noise transferring
- Nickel plated over zinc alloy fully shield housing, reliable mechanical structure
- Finish product in compact design, standard size fits with worldwide style outlets
- Compatible with Premium Line distinct modular patch panel for datacenter or cross connect use

Physical Characteristics

Jack	Phosphor bronze, 50µ inch gold plating over nickel in contact area
IDC	100µ inch nickel plated over phosphor bronze
Shielded Cover	50~60µ inch nickel plated over zinc alloy

Electrical Characteristics

Dielectric Strength	1000V RMS for 1min
Current Rating	1.5Amp Max.
Insulation Resistance	10MΩ Min.
Contact Resistance	2mΩ per contact
Temperature Range	-10°C to 60°C
Humidity	10%~90%; non condensing

Applications

- 10GBASE-T Ethernet
- 1000BASE-Tx Gigabit Ethernet
- 1000BASE-T Gigabit Ethernet
- 100BASE-Tx Fast Ethernet.
- 10BASE-T Ethernet.
- Voice, Video and other applications.

CATEGORY 6A CABLING SOLUTIONS

10 Gigabit Ethernet is nowadays viable solution for destinations with very high data traffic concentration like data center, server farms, MAN's and backbones.

Need of 10 Gigabit Service

Application as high resolution digital videos, medical imaging, digital animation, CAD/CAM, high speed data storage also require the quality of service (QoS) inherent in 10 Gigabit Ethernet. IP-based services such as VoIP and video will require extended bandwidth. Greater bandwidth is also required as voice, data and video networks are coming into structured cabling systems, as is the case already for today's more advanced security systems.

Standard of 10 Gigabit

In 2002 the IEEE ratified already a 10 Gigabit Ethernet standard for a full duplex fiber technology. Considering the world wide market need, the technology's potential and the economies offered by copper cabling system, both IEEE and TIA/EIA have now in summer 2006 ratified the new standard IEEE 802.3an TM Category 6A.

Demand of 10 Gigabit Systems

As from the experience of the past at that time 100 Mb/s and later on 1 Gb/s were as standards ratified we expect a potential for 10G structured cabling systems in the mass market. Bandwidth will be for many applications in the near future the key issue, so it will be important to invest future proofed in 10G-enabled twisted pair structured cabling solutions.

Premium Line 10G Category 6A cabling solution provides transmission performance that exceeds the industry standards for Category 6 parameters and supports the operation of 10GBASE-T over 100-meter. 10G Category 6A cabling solutions are qualified for frequencies up to 500 MHz and deliver guaranteed applications.

Features

1. Performance conforms to TIA/EIA 568-C.2, ISO/IEC 11801:2002 Ed2.0 & Amendment 1 draft, TIA-TSB-155 draft and EN 50173-1, IEEE 802.3an™ Category 6A specifications.
2. Supports T568 A&B Wiring & Easy installation.
3. Offers total solution of 10G Category 6A Network Cabling System.

Application

- 10GBASE-T Ethernet • 1000BASE-TX Gigabit Ethernet • ATM CB1G • 1000BASE-T Gigabit Ethernet
- 100BASE-TX Fast Ethernet • 10BASE-TX Ethernet • 155/622 Mbps ATM • 100 Mbps TP-PMD

Category 6A U/FTP Installation Cable

PART NO.	DESCRIPTION	PACKING SIZE
209642225	Premium Line Category 6A U/FTP Installation Cable, 500 m reel, LSOH, 600 MHz	45(O.D)x29.8(H) cm

Installation Cable Category 6A S/FTP 600MHz

Standards:

- ISO/IEC 2nd Edition Amendment 1.2
- CENELEC EN 50288-4-1
- IEC 61156-5 2nd Edition
- ANSI/TIA-568-C.2
- IEC 60332-1-2
- IEC 60754-2
- RoHS compliant

Application:

- 10G BASE-T Ethernet
- 1000BASE-TX (Gigabit Ethernet)
- 1000BASE-T (Gigabit Ethernet)
- 100BASE-TX Fast Ethernet
- 10BASE-T Ethernet
- Voice

Construction

Conductor	Material / size	Bare Copper / 23 AWG
Insulation	Material	Foam-Skin PE
Inner-Shield	Aluminum-Mylar	An aluminum foil Screen Around Each Pair
Braid	Material	Tinned Copper Covered Aluminum
	Diameter	7.4 ± 0.3 mm
Sheath	Material	LSOH
	Diameter	7.4 ± 0.3 mm

Mechanical & Environmental Characteristics

Bending Radius	≥ 6D, without load
	≥ 8D, with load
Operation Temperature	-20°C~+60°C
Installation Temperature	0°C~+50°C
Storage Temperature	-30°C~+60°C

ETL Certified 6 Round 1 Alien Near End Crosstalk Compliant Cable

During full network operation, all wire pairs in a cabling bundle simultaneously transmit in full duplex. Therefore, every single wire pair will be affected by transmissions on numerous wire pairs surrounding it in a cabling bundle or pathway.

AxTalk is a challenge for twisted-pair cabling as it is the most significant disturbance or noise source for the 10 Gb E applications. Premium Line Category 6A 6 round 1 cable is right design to fulfill this requirement.

Installation Cable Category 6A U/UTP 500MHz

Standards:

- ANSI/TIA-568-C.2
- ISO/IEC 2nd Edition Amendment 1.2
- CENELEC EN 50288-10-1
- IEC 61156-5 2nd Edition

Patch Panel Category 6A 1U Shielded Patch Panel

Premium Line Category 6A shielded patch panel fully shielded design optimizes shield effectiveness protection from EMI and alien crosstalk. It comply with ANSI/TIA-568-C.2, EN 50173-1 and ISO/IEC 11801 Class Ea specifications, supports T568 A&B wiring and easy installation. The complete module complies with EU RoHS directive. The construction in standard 1U 19" size suits all 19" rack installation. The main metal frame and rear back cover are made of SECC material, with the thickness over 1.0mm.

Physical Characteristics

Jack	Phosphor bronze, 50µ inch gold plating over nickel in contact area
IDC	100µ inch nickel plated over phosphor bronze
Shielded Cover	50-60µ inch nickel plated over zinc alloy

Electrical Characteristics

Dielectric Strength	1000V RMS for 1min
Current Rating	1.5Amp Max.
Insulation Resistance	10MΩ Min.
Contact Resistance	2mΩ per contact
Temperature Range	-10°C to 60°C
Humidity	10%-90%; non condensing

Applications

- 10GBASE-T Ethernet
- 1000BASE-Tx Gigabit Ethernet
- 1000BASE-T Gigabit Ethernet
- 100BASE-Tx Fast Ethernet.
- 10BASE-T Ethernet.
- Voice, Video and other applications.

All the products are verified to the electrical characteristics required in the directive.

179212419

Category 6A 1U Shielded Patch Panel

PART NO.	DESCRIPTION	PACKING SIZE
179212412	Premium Line Cat.6A 90° 1U Shielded Patch Panel, Dual Type IDC, 24 Ports, Black	50.5x27.9x27 cm
179212419	Premium Line Cat.6A 90° 1U Shielded Patch Panel, Dual Type IDC, 24 Ports, RAL7035	50.5x27.9x27 cm

Patch Panel Category 6A 0.5U Shielded Patch Panel

Premium Line Category 6A 0.5U shielded patch panel provides high density solutions which simplify and speed up the deployment and servicing. It is designed to provide maximum flexibility and high performance for all 10G networks. Performance conforms to proposed Cat.6A Permanent Link/Channel requirement of ANSI/TIA-568-C.2, EN 50173-1 and ISO/IEC 11801 Class Ea specifications.

Premium Line Category 6A 0.5U shielded patch panel is in standard 19" but in 0.5U size on the purpose of rack space saving. There are 24 ports in 0.5U or 48 ports in 1U with performance for 10 Gigabit Ethernet can be used and that is conformed to the standards for data centers ANSI /TIA-942 and ISO / IEC 24764.

Physical Characteristics

Jack	Phosphor bronze, 50µ inch gold plating over nickel in contact area
IDC	100µ inch nickel plated over phosphor bronze
Shielded Cover	50-60µ inch nickel plated over zinc alloy

Electrical Characteristics

Dielectric Strength	1000V RMS for 1min
Current Rating	1.5Amp Max.
Insulation Resistance	10MΩ Min.
Contact Resistance	2mΩ per contact
Temperature Range	-10°C to 60°C
Humidity	10%-90%; non condensing

Applications

- 10GBASE-T Ethernet
- 1000BASE-Tx Gigabit Ethernet
- 1000BASE-T Gigabit Ethernet
- 100BASE-Tx Fast Ethernet.
- 10BASE-T Ethernet.
- Voice, Video and other applications.

All the products are verified to the electrical characteristics required in the directive.

Modular Patch Panel Cat.6A 180 ° Unshielded Patch Panel

Premium Line Category 6A unshielded patch panel complies with ANSI/TIA-568-C.2, EN 50173-1 and ISO/IEC 11801 Class Ea specifications. The complete module complies with EU RoHS directive. The construction in standard 1U 19" size, suits all 19" rack installation. The main metal frame is made of SECC material, with the thickness over 1.0mm. Dual type IDC accepts 22-26 AWG solid cable, easy for termination with 110 or Krone tools. The finished product is available in 24 ports (1U).

Physical Characteristics

Jack	Phosphor bronze, 50µ inch gold plating over nickel in contact area
IDC	100µ inch nickel plated over phosphor bronze

Electrical Characteristics

Dielectric Strength	1000V RMS for 1min
Current Rating	1.5Amp Max.
Insulation Resistance	10MΩ Min.
Contact Resistance	2mΩ per contact
Temperature Range	-10°C to 60°C
Humidity	10%~90%; non condensing

Applications

- 10GBASE-T Ethernet
- 1000BASE-TX Gigabit Ethernet
- 1000BASE-T Gigabit Ethernet
- 100BASE-TX Fast Ethernet
- 10BASE-T Ethernet
- Voice, Video and other applications

All the products are verified to the electrical characteristics required in the directive.

Keystone Jack

Category 6A 180° Shielded Die-casting Keystone Jack, Slim Type

Premium Line 180 ° Category 6A shielded die-casting keystone jack in our new upgrade design, fully achieves the component standard ISO/IEC 11801 AMD:2 released in 2010. Extra 30% permanent link headroom margin guaranteed compared to traditional Category 6A products and links, and it's also the best choice to support IEEE 802.3an 10G applications.

- Category 6A module, ISO/IEC 11801 AMD2:2010-04 compliant
- Slim design gains the module fitting with all kinds of modular outlet/panel
- Short link 3 connectors ISO 11801 Permanent Link Tested
- Higher performance guarantees high data traffic and even expanding
- 100% test and report attached, quality assured and easy indicate
- For Datacenter horizontal crossconnect fast jumper to Inter-crossconnect
- Fast deployment for expanding and maintenance
- Shutter is optional

Physical Characteristics

Jack	Phosphor bronze, 50µ inch gold plating over nickel in contact area
IDC	100µ inch nickel plated over phosphor bronze
Shielded Cover	50~60µ inch nickel plated over zinc alloy

Electrical Characteristics

Dielectric Strength	1000V RMS for 1min
Current Rating	1.5Amp Max.
Insulation Resistance	10MΩ Min.
Contact Resistance	2mΩ per contact
Temperature Range	-10°C to 60°C

Patch Cord

Category 6A U/FTP Patch Cord

Premium Line Category 6A U/FTP system patch cord is designed for the high level project use. Compatible with the patch panel, keystone jack and installation cable, to constitute excellent channel performance. Compliant with Cat.6A standards as ANSI/TIA 568-C.2, ISO/IEC 11801 Class EA and EN 50173-1.

Construction

Conductor	Material / size	Bare Copper / 26 AWG
Insulation	Material	Foam-Skin PE
Inner-Shield	Aluminum-Mylar	An aluminum foil screen around each pair
Drain wire	Material	Stranded Tinned Copper
Sheath	Material	PVC / LSOH
	Diameter	6.0 ± 0.2 mm

Category 6A U/FTP Patch Cord, PVC

Length	Grey	Green	Blue	Red	Yellow
0.5 m	182810055	182810056	182810054	182810053	182810058

Toolless RJ45 Plug

Cat.6A Shielded Toolless RJ45 Plug

Premium-Line Category 6A Toolless RJ45 Plug is engineered to provide full shield protection and reliability, support up to 10 Gigabit Ethernet applications and ensure maximum performance and superior signal quality.

- Meeting the ANSI/TIA-568-C.2, ISO/IEC11801 and EN50173-1 specifications.
- Complying with category 6A patch cord testing performance requirements.
- Connector accepts 22-26 AWG solid and stranded shielded cables.
- Supporting T568 A&B wiring & easy installation.
- Terminating cable without tools.
- Ideal for industrial applications.

Cat.6A Shielded Toolless RJ45 Plug

PART NO.	DESCRIPTION	PACKING SIZE
159210001	Premium Line Cat.6A shielded toolless RJ45 plug	53.8x31x23 cm

Patch Cord

Category 6A S/FTP Patch Cord

Premium Line Category 6A S/FTP patch cord supports whole link achieves Class EA 500MHz 10G channel applications.

To realize the high performance, the cable is coming with two shielding layers. Each pair is wrapped by individual Aluminum-Mylar film, to eliminate the near end pair to pair interferences.

Again a tinned copper braid laid over the inner structure, provides protection against outside EMI interferences.

Pair Individual foiled

Overall Braid Shielding

S/FTP Category 6A 10G Cord

Industrial Face Plate

Industrial Face Plate, W/ Shielded Keystone Jack

- Keystone jack's performance conform to ANSI/TIA-568-C.2, ISO/IEC 11801 and EN 50173-1 specifications
- Supports T568 A&B wiring
- Terminate using 110 or Krone tools
- Face plate material: stainless steel, sealing material: FKM
- Face plate thickness: 1.0mm, size: 130x130mm
- Back box material: ABS, size: 128x128x67mm
- Ingress protection rating: IP67, according to IEC 60529:2001-02
- RoHS compliant

Flexible Consolidation Point Cable

Class EA 10G CP Cable

Flexible consolidation point cables are popular in horizontal cabling system, with its featured characteristic – Easy and Fast Deployment – is realized by professional IT staff, and it's applied in many occasions and places, like ZDA to EDA in datacenter, open office easy and quick expanding nodes, extensions in horizontal cabling etc.

Premium Line offers Class EA 10G CP cable which is 100% through factory Short Link 3 Connectors ISO 11801 Permanent Link tested and verified with features as,

- Flexible patch cable
- RJ45 plug to keystone jack (109824010)
- Optional keystone upon choice
- Factory terminated and tested
- Available length 5m, 7m, 10m, 20m
- Test service and results attached

Class EA S/FTP CP Cable, LSOH

20m	71942200520	71942200020

CATEGORY 6 CABLING SOLUTIONS

With over 20 years experience and know-how on communicating products design & developing, Premium Line has built maturity systems both in high tech develop and research center & complete structural quality assurance lab and team. With team approach, all components and the cabling solutions, definitely will be your first choice and reliable selection.

Solutions and Components

Currently, the Category 6 solution is the most popular in the structural cabling. Premium Line has been the high quality source in the worldwide market since this becoming the trend. With the comprehensive product range, we supply components – communication cables, keystone jacks, compact outlets, patch panels, patch cables... the complete solutions and system warranty. All these products and solution performance has been verified and approved by third party laboratory – “3P” and “ETL” . After years of good result in market also systemically upgrading of the products, assure you the great benefits both in quality and cost.

Our Quality Guarantee

To build a complete high level channel in the project, the precondition is to make sure each component with compatible resistance, thus, the best solution is to use the same brand products or single component with excellent performance.

Premium Line offers you complete Category 6 system solutions which fulfill these requirements, also with the internal specific definition and qualification procedure for each single component is right on the purpose to ease the installation with good and convincing field test results.

Be Our 25 Years Warranty Member

To guide and support companies, which use complete Premium Line brand owned products, we offer the 25 years warranty. Premium Line will hold distributor and installer trainings and certification. With this certificate, all members will be available to apply for 25 years quality warranty and service.

Project Support

Our sales team will share you marketing strategy and almost world project information, which will help you to win the bid. Our international purchasing team will source you the special products to make your supply chain easy and simple.

Category 6 U/UTP Installation Cable

PART NO.	DESCRIPTION	PACKING SIZE
206141115	Premium Line Category 6 U/UTP Installation Cable, 305m Box, PVC, Grey	42x42x21 cm
206142115	Premium Line Category 6 U/UTP Installation Cable, 305m Box, LSOH, Grey	42x42x21 cm

Installation Cable

Category 6 U/UTP Outdoor Gel Filled

Premium Line Category 6 gel filled cable is ideally designed for outdoor cabling. Each conductor made by annealed 23AWG bare copper, guarantees the conductor elongation strength, the semi-solid gel filling around each pair, against the water penetration and protects inner insulation from vile weather. The cable completed with excellent PE out sheath, ensures it could endure all weather condition in temperature range -40°C ~60°C.

Standards:

- ANSI/TIA-568-C.2
- ISO/IEC 2nd Edition 11801 CLASS E
- CENELEC EN 50173-1
- CENELEC EN 50288-6-1, IEC 61156-5 for horizontal cable
- RoHS compliant

Application:

- CCTV IP system video, voice transmission
- POE system
- 1000BASE-TX (Gigabit Ethernet)
- 1000BASE-T (Gigabit Ethernet)
- 100BASE-TX Fast Ethernet
- 10BASE-T Ethernet
- Voice

Keystone Jack

Category 6 Shielded Die-Casting Keystone Jack

Premium Line 180 ° shielded die-casting keystone jack in special design for optimal EMI protection. Tool-less design does not need additional tools for termination, supports T568 A&B wiring.

Keystone Jack

Category 6 Shielded Keystone Jack

Premium Line 90 ° shielded keystone jack in fully shielded design, optimizes shield effectiveness protection from EMI. Dual IDC connector can accept 22-26 AWG solid cables, supports T568 A&B wiring, and it uses 110 or Krone tools for termination.

Premium Line Category 6 shielded keystone jack performance conforms to ANSI/TIA-568-C.2, ISO/IEC 11801 and EN50173-1 Category 6 specifications, supports the channel link bandwidth up to 250MHz.

Physical Characteristics

Jack	Phosphor bronze, 50µ inch gold plating over nickel in contact area
IDC	100µ inch nickel plated over phosphor bronze
Shielded Cover	50~60µ inch nickel plated over phosphor bronze

Electrical Characteristics

Dielectric Strength	1000V RMS for 1min
Current Rating	1.5Amp Max.
Insulation Resistance	10MΩ Min.
Contact Resistance	2mΩ per contact
Temperature Range	-10°C to 60°C
Humidity	10%~90%; non condensing

Applications

- 1000BASE-TX Gigabit Ethernet
- 1000BASE-T Gigabit Ethernet
- 100BASE-TX Fast Ethernet
- 10BASE-T Ethernet
- Voice, Video and other applications

106211010

Physical Characteristics

Body Material	Housing: PC, UL94 V-0 Body: zinc die-casting
Jack Contact	Phosphor bronze, 50µ inch gold plated over nickel
IDC Contacts	100µ inch nickel plated over phosphor bronze

Electrical Characteristics

Dielectric Strength	1000V RMS for 1min
Current Rating	1.5Amp Max.
Insulation Resistance	10MΩ Min.
Contact Resistance	2mΩ per contact
Temperature Range	-10°C to 60°C
Humidity	10%~90%; non condensing

Applications

- 1000BASE-TX Gigabit Ethernet
- 1000BASE-T Gigabit Ethernet
- 100BASE-TX Fast Ethernet.
- 10BASE-T Ethernet.
- Voice, Video and other applications.

Keystone Jack

Category 6 90° Unshielded Keystone Jack

Premium Line 90° unshielded keystone jack is in classical design, the dual type IDC accepts 22-26 AWG solid cables, easy terminated with 110 or Krone tools, supports T568 A&B wiring.

With its good & stable performance, this module earns the good sales result in the market.

Physical Characteristics

Housing	PC, UL94 V-0
Jack Contact	Phosphor bronze, 50µ inch gold plated over nickel
IDC Contacts	100µ inch nickel plated over phosphor bronze

Electrical Characteristics

Dielectric Strength	1000V RMS for 1min
Current Rating	1.5Amp Max.
Insulation Resistance	10MΩ Min.
Contact Resistance	2mΩ per contact
Temperature Range	-10°C to 60°C
Humidity	10%~90%; non condensing

Applications

- 1000BASE-TX Gigabit Ethernet
- 1000BASE-T Gigabit Ethernet
- 100BASE-TX Fast Ethernet
- 10BASE-T Ethernet
- Voice, Video and other applications

106111010

Keystone Jack

Category 6 180° Unshielded Keystone Jack

Premium Line 180° unshielded keystone jack is in classical design, it's compatible with all Premium Line unloaded modules. The dual type IDC accepts 22-26 AWG solid cables, easy terminated with 110 or Krone tools, supports T568 A&B wiring.

With its good & stable performance, this module earns the good sales result in the market.

Keystone Jack

Category 6 90° Unshielded Slim Keystone Jack

Premium Line Category 6 90° unshielded slim keystone jack is the mini type of standard 90° unshielded keystone jack as its naming. All inner construction and characteristics are same as normal one.

Physical Characteristics

Housing	PC, UL94 V-0
Jack Contact	Phosphor bronze, 50µ inch gold plated over nickel
IDC Contacts	100µ inch nickel plated over phosphor bronze

Applications

- 1000BASE-TX Gigabit Ethernet.
- 1000BASE-T Gigabit Ethernet.
- 100BASE-TX Fast Ethernet.
- 10BASE-T Ethernet.
- Voice, Video and other applications.

106311010

Keystone Jack

Category 6 180° Unshielded Shutter Type Keystone Jack

Premium Line Category 6 180° unshielded shutter type keystone jack is ideally designed to protect jack against ingress of dirt, ease the work in field installation and future ports management. The rest is same as standard 180° keystone module, supports easy termination, accepts 22-26 AWG solid cables, supports T568 A&B wiring. The finish product complies with EU ROHS directive.

Physical Characteristics

Housing	PC, UL94 V-0
Jack Contact	Phosphor bronze, 50µ inch gold plated over nickel
IDC Contacts	100µ inch nickel plated over phosphor bronze

Applications

- 1000BASE-TX Gigabit Ethernet.
- 1000BASE-T Gigabit Ethernet.
- 100BASE-TX Fast Ethernet.
- 10BASE-T Ethernet.
- Voice, Video and other applications.

Modular Patch Panel

High Density Unloaded Patch Panel

Premium Line unshielded compact unloaded patch panel is in dedicated design to adopt Premium Line 180° unshielded keystone jack or 90° slim keystone jack, to meet different place use intentions. Each port has sequence numbering, plastic labeling remark and above markable position, for future port identification or re-management. Main body is made of single complete steel plate, finished in 1U 19" size, suits for all standard 19" rack installation.

Patch Panel

Category 6 1U Shielded Patch Panel

Premium Line Category 6 shielded patch panel comply with ANSI/TIA-568-C.2, ISO/IEC 11801 and EN 50173-1 Class E specifications. The complete module complies with EU RoHS directive.

The construction in standard 1U 19" size suits all 19" rack installation. The main metal frame and rear back cover are made of SECC material, with the thickness over 1.0mm. Dual type IDC accepts 22-26 AWG solid cable, easy for termination with 110 or Krone tools. The finished product is available in black or light gray RAL7035 color.

Physical Characteristics

Jack	Phosphor bronze, 50µ inch gold plating over nickel in contact area
IDC	100µ inch nickel plated over phosphor bronze
Shielded Cover	50-60µ inch nickel plated over phosphor bronze

Electrical Characteristics

Dielectric Strength	1000V RMS for 1min
Current Rating	1.5Amp Max.
Insulation Resistance	10MΩ Min.
Contact Resistance	2mΩ per contact
Temperature Range	-10°C to 60°C
Humidity	10%-90%; non condensing

Applications

- 1000BASE-TX Gigabit Ethernet
- 1000BASE-T Gigabit Ethernet
- 100BASE-TX Fast Ethernet
- 10BASE-T Ethernet
- Voice, Video and other applications

Patch Panel

Category 6 0.5U/24 Port & 1U/48 Port Unshielded Patch Panel

Premium Line Category 6 19" high density patch panel, 24 port in 0,5U and 48 ports in 1U Size, could significantly expand your capacity by space saving in the rack! For any cross-connect rack and HC networking rack in the datacenter or TR, it's the ideal design to achieve more flexible deployment and also anytime available end subscribers' expansion. Two pieces easy click-in cable management bar at the back side is high strength affordable. The compact design saving physical space in rack and combine with its quality headroom margin performance, the panel is your ideal budget saving and competitive solution to others.

Patch Cord

Category 6 S/FTP Patch Cord

Premium Line Category 6 S/FTP system patch cord is factory verified products, dedicated for datacenter and high end project use.

To realize the high performance, the cable is coming with two shielding layers. Each pair is wrapped by individual Aluminum-Mylar film, to eliminate the near end pair to pair interferences.

Again an aluminum coated braiding laid over the inner structure, provides protection against outside EMI interferences.

Compliances:

- ANSI/TIA-568-C.2 Category.6
- ISO/IEC 11801 2nd Edition Class D
- CENELEC EN 50173-1 Class D
- CENELEC EN 50288
- 3P Certified Channel Performance
- Flame retardance according to IEC 60332-1-2
- RJ45 contacts 50µ inch gold plated
- Molded snag proof boot
- RoHS compliant

Applications:

- Premises environment, ideal for severe electrical interference places, or along with active power devices
- 1000BASE-TX Gigabit Ethernet
- 1000BASE-T Gigabit Ethernet
- 100BASE-TX Fast Ethernet
- 10BASE-T Ethernet
- Voice, Video and other applications

Patch Cord Category 6 U/UTP System Patch Cord

Premium Line Category 6 U/UTP system patch cord is designed for the high end project use. Compare to normal U/UTP patch cable, system patch cord exists a PE cross member, each pairs of whole cable retain the same stranding appearance and pitch as designed, even after transportation, cabling, wiring and management, this is the key factor to guarantee performances in various application.

Compliances:

- ANSI/TIA-568-C.2
- ISO/IEC 11801 2nd Edition
- CENELEC EN 50173-1
- CENELEC EN 50288
- 100% factory tested to component level performance as per TIA/EIA-568-C.2 specifications
- Flame retardance according to IEC 60332-1-2
- RJ45 contacts 50µ inch gold plated
- Molded snag proof boot
- RoHS compliant

Applications:

- Premises environment, option for equipment cord in cross-connect, ideal for 4 plug-in and above applications,
- 1000BASE-TX Gigabit Ethernet
 - 1000BASE-T Gigabit Ethernet
 - 100BASE-TX Fast Ethernet
 - 10BASE-T Ethernet
 - Voice, Video and other applications

Construction

Conductor	Material / size	Bare Copper / 24 AWG
Insulation	Material	HDPE
Sheath	Material	PVC / LSOH
	Diameter	6.4 ± 0.2 mm

Patch Cord Category 6 U/UTP Retail Patch Cord

Premium Line Category 6 U/UTP retail patch cord supports the whole Category 6 channel transmission as per standard ANSI/TIA-568-C.2, ISO/IEC 11801 and EN 50173-1 Class E specifications.

Construction

Conductor	Material / size	Bare Copper / 24 AWG
Insulation	Material	HDPE
Sheath	Material	PVC / LSOH
	Diameter	5.8± 0.3 mm

Category 6 U/UTP Retail Patch Cord

PART NO.	DESCRIPTION
1861xyyyz	Premium Line Category.6 U/UTP Retail Patch Cord, 24AWG
"x" , 1 = PVC; 2 = LSOH "yyy" , 005 = 0.5m; 010 = 1.0m; 020 =2.0m; 030 = 3.0m; 050 = 5.0m; 070 = 7.0m; 100 = 10.0m

Patch Cord Category 6 U/UTP Slimline Patch Cord

Construction

Conductor	Material / size	Bare Copper / 30 AWG
Insulation	Material	HDPE
Sheath	Material	LSOH
	Diameter	3.1 ± 0.2 mm

Category 6 U/UTP Slimline Patch Cord

PART NO.	DESCRIPTION
18692yyyz	Premium Line Category.6 U/UTP SlimLine Patch Cord, LSOH
"yyy" , 003 = 0.3m, 005 = 0.5m, 010 = 1.0m, 020 = 2.0m	
"z" , 1 = White, 2 = Black, 3 = Red, 4 = Blue, 5 = Grey, 6 = Green, 8 = Yellow	

Flexible Consolidation Point Cable Category 6 U/UTP CP Cable

Flexible consolidation point cables are popular in horizontal cabling system, its featured characteristic – Easy and Fast Deployment – is realized by professional IT staff, and it's applied in many occasions and places, like ZDA to EDA in datacenter, open office easy and quick expanding nodes, extensions in horizontal cabling and etc.

Premium Line Category 6 Giga Ethernet CP cable is 100% factory Short Link 3 Connectors Permanent Link test verified and passed.

- Flexible patch cable
- RJ45 plug to keystone jack (106721010)
- Optional keystone upon choice
- Factory terminated and tested
- Available length 5m, 7m, 10m, 20m
- Test service and results attached

Category 6 U/UTP CP Cable, PVC

Length	Grey
5m	71661050550
7m	71661070550
10m	71661100550
20m	71661200550

CATEGORY 6 CABLING SOLUTIONS

CATEGORY 5e CABLING SOLUTIONS

With the high speed data transmission requirement in LAN, 1998 IEEE ratified standard 802.3z defined protocol 1000BASE-T over Category 5e and higher level Ethernet cabling system. After that, with the step into 21st century, Category 5e (class D) cabling took the place of Category 5 cabling, and it became the main trend in data cabling market.

As 1000BASE-T defines that the Category 5e works in full-duplex mode, uses the complete 4pairs to transceive in the meantime, then this means each pair will receive the interference from other 3pairs, as well as the ground noise. Then this requires the link and components in use must be with sufficient headroom margin.

Premium Line supplies complete Category 5e solutions and components, meeting and over standard ANSI/TIA 568-C.2, ISO/IEC 11801 ED.2, EN 50173-1, the Category 5e channel is guaranteed to fully support the corresponding protocols & communication services over 100m. Moreover, as a Germany brand, Premium Line provides you complete EU RoHS compliant solutions.

Nowadays, with expansion services over Ethernet expediting, like IP phone, IP camera, security and control systems, intelligence home systems and etc., these do expand the traditional Category 5e cabling market. Also considering the future telephone system upgrading, more and more telephone subsystems suggest using Category 5e communication cable. Bases on all these, Premium Line will always provide you adequate Category 5e solutions and warranties.

Premium Line Category 5e Cabling Solutions

Installation Cable

- Category 5e F/UTP 100MHz
- Category 5e U/UTP 100MHz
- Category 5e U/UTP Outdoor Gel filled

Keystone Jack

- Category 5e 180°Shielded Die-Casting Keystone Jack
- Category 5e 90° Shielded Keystone Jack
- Category 5e 90° & 180° Unshielded Keystone Jack

Patch Panel

- Category 5e Shielded Patch Panel
- Category 5e Unshielded Patch Panel
- Category 5e 0.5U/24 Port & 1U/48 Port Unshielded Patch Panel

Patch Cord

- Category 5e F/UTP Patch Cord

- 100BASE-TX Fast Ethernet
- 10BASE-T
- Voice, ISDN

Premium Line Category 5e gel filled cable is ideal design for outdoor cabling. Each conductor is made of annealed 24AWG bare copper, to guarantee the conductor elongation strength. The semi-solid gel filling around each pair saves against water penetration and protects inner insulation from vile weather. The cable is finished with excellent PE out sheath to ensure it could endure all weather condition in temperature range -40°C ~60°C.

Construction

Conductor	Material / size	Bare Copper / 24AWG
Insulation	Material	HDPE
Sheath	Material	PE
Filling Gel		NUFLEX RE-4088

Mechanical & Environmental Characteristics

Keystone Jack

Category 5e 180° Shielded Die-Casting Keystone Jack

Premium Line 180 ° shielded die-casting keystone jack in special design for optimal EMI protection. Tool-less design no additional tools for termination needed, supports T568 A&B wiring. The finished product complies with EU RoHS directive.

Physical Characteristics

Body Material	Housing: PC, UL94 V-0 Body: zinc die-casting
Jack Contact	Phosphor bronze, 50μ inch gold plated over nickel
IDC Contacts	100μ inch nickel plated over phosphor bronze

Electrical Characteristics

Dielectric Strength	1000V RMS for 1min
Current Rating	1.5Amp Max.
Insulation Resistance	10MΩ Min.
Contact Resistance	2mΩ per contact
Temperature Range	-10°C to 60°C
Humidity	10%~90%; non condensing

Applications

- 1000BASE-T Gigabit Ethernet
- 100BASE-TX Fast Ethernet.
- 10BASE-T Ethernet.
- Voice, Video and other applications.

Patch Panel

Category 5e Shielded Patch Panel

Premium Line Category 5e shielded patch panel complies with ANSI/TIA-568-c.2, ISO/IEC 11801 and EN50173-1 Class D specifications, The complete module complies with EU RoHS directive. The construction in standard 1U 19" size, suits all 19" rack installation. The main metal frame and rear back cover made by SECC material, with the thickness over 1.0mm. Dual type IDC accepts 22-26 AWG solid cable, easy for termination with 110 or Krone tools. The finished product is available in black or light gray RAL7035 color.

Physical Characteristics

Jack	Phosphor bronze, 50µ inch gold plating over nickel in contact area
IDC	100µ inch nickel plated over phosphor bronze
Shielded Cover	50-60µ inch nickel plated over phosphor bronze

Electrical Characteristics

Dielectric Strength	1000V RMS for 1min
Current Rating	1.5Amp Max.
Insulation Resistance	10MΩ Min.
Contact Resistance	2mΩ per contact
Temperature Range	-10°C to 60°C
Humidity	10%~90%; non condensing

Category 5e 0.5U/24 Port & 1U/48 Port Unshielded Patch Panel

Premium Line Category 5e 19" high density patch panel, 24 port in 0.5U and 48Ports in 1U Size, could significantly expand your capacity by space saving in the rack! For any cross-connect rack and HC networking rack in the datacenter or TR, it's the ideal design to achieve more flexible deployment and also anytime available for end subscribers' expansion. Two pieces easy click-in cable management bar at the back side is high strength affordable. The compact design saving physical space in rack and combines with its quality head-room margin performance, the panel is your ideal budget saving and competitive solution to others.

All the products are verified to the electrical characteristics required in the directive.

Category 5e 0.5U/1U Unshielded Patch Panel

PART NO.	DESCRIPTION	PACKING SIZE
175182412	Premium Line Category 5e 0.5U UTP Patch Panel with One Cable Management Bar, 24 Ports	52x24x36 cm
175144812	Premium Line Category 5e 1U UTP Patch Panel with Two Cable Management Bars, 48 Ports	51.5x24x35 cm

Patch Cord

Category 5e F/UTP Patch Cord

Premium Line Category 5e F/UTP patch cord supports the whole channel transmission as per standard ANSI/TIA-568-C.2, ISO/IEC 11801 and EN 50173-1 Class D specifications. With overall aluminum screen protection, against the environment noise also avoid signals leak. The 26 AWG stranded conductor and flexible construction is easy to bend or manage. Normally, the patch cord will be in TIA 568B wiring, TIA 568A or other wiring method upon request. The patch cord is finished with snag proof boot.

Applications

- 1000BASE-T Gigabit Ethernet
- 100BASE-TX Fast Ethernet.
- 10BASE-T Ethernet.
- Voice, Video and other applications.

Construction

Conductor	Material / size	Bare Copper / 26AWG

CATEGORY 5e CABLING SOLUTIONS

Navigator Patch System

The patented Navigator Patch System technology is embedded to a regular patch panel to keep the price reasonable. The built-in LEDs allow the identification of the cable connection to the workstations quickly and accurately without interfering the network performance. Time-consuming one-by-one checking with hard-to-hear tone generators is a thing of the past. Finding the right cable for adds, moves or changes is as easy as turning on a light.

Premium Line Navigator Patch System

Navigator Patch System

Unshielded Navigator Patch Panel

90° Unshielded Navigator Keystone Jack

Transmitter

High Efficiency

The horizontal cable installation and patch cord connection are the most time-consuming processes. With Navigator patch panel, operators don't have to check the complicated drawing and label patch cords and panels. Navigator patch panel can greatly improve the installation efficiency.

Debugging

You can find out the failure by LED display simply, don't need to check the drawing. To maintain the cabling system become easily.

Security

Random port installation and no labeling are helpful to Information security management. Comply with BS 7799 or ISO 27001 standard.

Choice of Wise

There is no competitive product to the Navigator Patch System. The difference makes you win the project.

Economical Solution

1. Saving the installation time and labor cost
2. No need dedicated staff to operate
3. Visualized LED indication, easily problem determination
4. NO additional cost for software, device or system upgrade

VOICE & OUTLETS PRODUCT SERIES

Premium Line voice product series mainly focus on classical voice cabling, including multipair cables- available for indoor backbone cabling & outdoor campus cabling, And also the data & voice outlets are aimed to furnish an enjoyable subscriber node with popular design and its cosmetic, standard RJ45 Category 3 voice and data patch panels, patch cords and installation cables, to constitute a complete voice cabling solution.

Multipair Cables

Premium Line mainly supplies Category 3 and Category 5 multipair cables, normally core number could be 5pairs, 10pairs, 25pairs, 50pairs, 100pairs, including both indoor and outdoor gel filled type, for indoor backbone use and campus cabling application.

All multipair cables meet or exceed ANSI/TIA/EIA 568A, ISO/IEC 11801, EN 50173 specification.

ISDN Patch panels

Standard RJ45 jack, and 19" 1U/2U size, provides 25ports/50ports options, suit for rack installation.

Data & Voice Outlets

Apart from the cabling solutions, Premium Line various types faceplate in popular design is aimed to furnish all your cabling nodes and subscriber outlets

Patch Panel

Category 3 Unshielded Patch Panel

Premium Line Category 3 unshielded patch panel complies with ANSI/TIA 568C.2, ISO/IEC 11801, EN 50173 specifications. The complete module complies with EU RoHS directive.

The construction in standard 1U 19" size, suits all 19" rack installation. The main metal frame and rear back cover made by SECC material, with the thickness over 1.0mm. 4P4C terminal block for 25 ports, and 8P8C for 50 ports type. The finished product is available in black or light gray RAL7035 color.

Physical Characteristics:

- Jack: Phosphor bronze, 3μ inch gold plating over nickel in contact area
- IDC : 30μ inch phosphor bronze or tin plated over nickel

Application:

- 10BASE-T Ethernet
- Supports all voice systems

Data Center Server Cabinet

As a core part of the entire cabling system, cabinet are widely used and also take an irreplaceable role in the equipment room. Nowadays cabinet not only has the simple function of storing devices but also can provide protection, electromagnetic interference shielding, and arrange equipment orderly to facilitate future maintenance.

Premium Line provides a complete cabinet solution including the server cabinets, wall mount cabinets, cable management units & mounting accessories, also with active power supply devices, like power distribution unit, uninterruptible power supply and etc.

Network Server Cabinet

Premium Line 19" server cabinets and wall mount cabinets meet the international standards ANSI /EIARS-310-C19, ANSI /EIARS-310-D, IEC 297-3, IEC 529 and DIN 40050.

Premium Line server cabinets are available in standard 19" , 600 × 800, 800 × 800 sizes, but not limit in this two options of size. We mainly supply the 27U, 32U, 37U, 42U types. The front door is available in high strength toughened glass or perforated metal. The complete cabinet is made by excellent steels available to afford maximum 800kg static loading.

Normally, the fixed accessories include cage nuts, castors and leveling feet. And there also exists various optional accessories for your most economical combinations, including fixed shelf, keyboard tray, front blank panel and cable managements, besides, all free standing cabinets are available for 4 fans installation, and also with required power cords.

Wall Mount Cabinet

Premium Line wall mount cabinets are mostly popular in single section or dual section design, to afford maximum 60kg static loading. It's available in size 19" 600 × 450, 6U, 9U, 12U, 15U and 18U. The wall mount cabinets are in key lockable design, and come with front glass door. All wall mount cabinets are available for 2 cooling fans installation. Normally, the wall mount cabinets are pre-assembled for shipping.

Power Distribution Unit

Premium Line provides worldwide various type power outlets and power cords. Normally it's in standard 1U height suit for standard 19" cabinet installation. Premium Line standard PDU comes with lighted master switch, but, the additional function like surge protection, current display is available as well, the size will change to 1.5U.

The left end single input and frontal installation design is easy for future management and allocation.

Aisle Containment

Features:

- The Aisle Containment System is a modular row-based thermal containment solution, which separates cold and hot datacenter air streams to and from equipment. It manages airflow at the source, increases the cooling efficiency and significantly lowers down operating costs.
- Row level thermal containment improves cooling efficiency and predictability to address zones and complete data center deployments.
- Most parts of the aisle containment components are modular, which allows quick deployment on site and addresses changing needs or future expansion with pay-as-you grow architecture.
- The aisle containment is adaptable for enhanced network server cabinet (61586xyy2 or 61588xyy2)
- Provides the right combination of safety and security, dual mechanical doors or sliding doors are available options.
- Designed and built to provide high level security solutions for computer rooms, server rooms, and co-location data centers.

Enhanced Network Server Cabinet

Features:

- connected by four corner to ensure the stability
- curved perforated front door and rear dual perforated door enable reliable operation with ventilation rate up to 78%
- double-section side panel can be easily assembled separately
- up to 1500 kgs static loading capacity with adjustable feet
- "U" mark mounting rail for clear and easy identification
- 4pcs of M12 adjustable feet and 4pcs of heavy duty castors included
- 40sets M6 cage nuts included
- optional Fan unit (6 fans and 2m single input power cord for 800mm depth and above)

Standard:

- Compliant with ANSI/EIA RS-310-D, IEC297-2, DIN41491. Part1, Part7, DIN 4144 standards

Material:

- Frame: SPCC cold rolled steel
- Thickness: Frame and mounting vertical rail: 2.0mm
- Horizontal bracket: 2.0mm, Side door: 1.2mm
- Others: SPCC cold rolled steel
- Others: 1.5mm

Wall Mount Cabinet Dual Section

Premium Line double section is really suitable for server rooms, audio rooms, wiring closets, manufacturing areas, warehouses, or anywhere where heavy networking equipment needs to be protected and maintained usually.

Pick up and slot in back holes ensure convenient and quick wall mounting.

Features:

- Cable entry from top and bottom
- Top cover ready for cooling fan installation
- 60 kg static loading capacity
- Toughened glass front door with over 180° angle
- Lockable side door easy to open for installation
- Fixed 100mm back section space

Fan Unit & Shelf Digital Temperature Unit

This unit is mainly used for temperature control and highest temperature limit alarm in the cabinets, which has the characteristics of high reliability, simply to use and easily to operate. Meanwhile, it also can show the values of current Voltage, Ampere, Temperature and humidity. Including a 2m power line. Its operating environment is -5°C ~60°C, the relative humidity is 20%~85% (Non-condensation).

Power Distribution Unit European Type

Features:

- Conform to DIN49440 and DIN49441
- single input at left side
- Maximum 16A 250V AC current capacity, 3.5KW
- Lighted master switch
- 1U, frontal installation for standard 19" cabinets
- 2m power cord, other length upon request
- Color: aluminum or plastic frame in black
- RoHS compliant

631210812

Power Distribution Unit UK Type

Features:

- BS1363 standard UK socket and plug
- Maximum 13A 230V AC current capacity, 3KW
- Lighted master switch
- Standard 1U 6 output and 1.5U 6 output with surge protect
- 2m power cord, other length upon request
- Color: aluminum or plastic frame in black
- RoHS compliant

632220612

Power Distribution Unit Surge Protector Type

Features:

- Available in European, UK & UL types
- Standard 1.5U mounting size, aluminum frame
- Dimension: 482.6 × 66.67 × 62mm
- Optional lighted master switch
- 2m power cord, other length upon request
- Other type PDU upon request
- RoHS compliant

631810712

Power Distribution Unit American Type

Features:

- IEC60906 two-pole socket-outlets with grounding contact
- single input at left side
- Maximum 10A 110V AC current capacity, 2.5KW
- Lighted master switch
- 1U, frontal installation for standard 19" cabinets
- 2m power cord, other length upon request
- Color: aluminum or plastic frame in black
- RoHS compliant

Fiber Optic Solution

Since over 30 years ago first fiber optic data cable have been installed and applied, now, with the improvement of fiber optic technique and also considering competitive costs of the complete range of optic devices, our Fiber Optic Solution surely fulfills the high speed data network and telecommunication requirements.

Optic Fiber- Made by the most common substance, silicon dioxide (SiO_2), in complete core diameter 9um - single mode, 62.5um - OM1, 50um - OM2/OM3/OM4, and with 125um refraction cladding, to afford light signal transmission supports long distance and high speed data network & telecommunication.

Technology- To use the light to transmit the signals from one place to another place over optic fiber, is due to the light propagates through the fiber with little attenuation also immune to electromagnetic interference. These advantages also contribute to fiber optic development and practical application.

Wide Area Network- Single mode fiber optic cables are increasingly used for long distance telecommunication & data network, so called classical WAN - wide area network. The fiber optic cable normally could be placed in outdoor conduits or directly aerial installation.

Premium Line WAN fiber optic system provides two installation types and customizes various cable constructions on your special requirements like ADSS- recommended, if electrical shock might happen; Figure 8 outdoor aerial cable best for extreme weather conditions like heavy wind or ice. Premium Line also provides outdoor accessories like splice closures, available for aerial, direct ground buried and duct installation purpose.

Local Area Network- In most classical premise cabling, SM or MM fiber optic cables are more used as backbone cabling, They convert the optical signals to electrical signals to the end subscriber through the corresponding copper communication cables. LAN cables also will be used for distances over 100 meters, which are not available for copper cables.

Regarding to the pure fiber optic cabling system, with the PON- passive optical network system develop, like IEEE E-PON, ITU G-PON, the one point to multipoint network. Also the extension base on above systems and protocol comes with FTTX applications which depend on the ONU location. Premium Line LAN fiber optic systems provides different type cables to fulfill these fiber optic solutions, especially the FTTH cable series, with customer' s choice on normal G652D fibers, or G657A low bending loss fiber for complex corner-bending situation. Premium Line is capable to provide you all types' high quality and reliable fiber optic cables.

Component- Premium Line solution includes a full range of optic devices, fiber optic cables, and also the accessories like pigtails, patch cords, adapters and different type' s terminal boxes. Premium Line has complete ranges of these components with low attenuation loss control, combines with fiber optic cables, support the complete channel with good headroom margin.

ADSS Fiber Optic Cable, 9/125um G652D

Customized Fiber Optic Cable

Premium Line dedicated fiber optic technical team capable to design various telecom systems cables for you base on requirements or provided location climate information where intend to use.

All Dielectric Self Supporting Fiber Optic Cable

This kind of cable more often be installed on overhead power lines, gantries or poles, its' all dielectric construction protect it against electric shock impact or damage.

Normally, you can provide us the local climate information also the electrical field strength to design it accordingly.

Cable Physical / Environmental Performance	
Maximum Span	100 meters
Cable Sag (%)	1.0%
Temperature Range	-20 °C to +70 °C
Worst Environmental Conditions	100 kms/hr wind speed (No Ice)
Cable Characteristics	
Maximum Working Tension (No Fiber Strain)	4.12 kN (420 kgs)
Estimated Tensile Strength	10.3 kN (1050 kgs)
Thermal Coefficient of Expansion	20.83x10 ⁻⁶ °C
Area of Aramid	4.5 mm ²
Approx. Cable Weight	120 kgs/km
Cable Diameter	12.2 mm
Radial Thickness of Sheath	1.5 mm
Minimum Bending Radius	Dynamic 700 mm, Static 350 mm
Crush Resistance	2000 N/10 cm
Water Penetration	No water penetration of the cable core, on a 3 meter sample, with a 1 meter head of water applied for 24 hours
Outer Sheath Materia	HDPE (non anti-tracking)
Max. Electrical Field Strength	≤ 12 kV/m tested according to IEEE P1222

Environmental Condition and Cable Loads, Sags, etc.

Condition	Temp	Wind km/hr	Cable Load kgs	% UTS	Sag (mtrs)		Blow Out Angle	Cable Elong %

Wide Area Network Fiber Optic Dome Type Splice Enclosure

Premium Line fiber optic dome type splice enclosure is in hermetically sealed design, easy for assembly and re-entry. The closure is designed with a gasketed split end plate for mid-access cable application and includes an integrated stack storage basket. Max. 6 x 24 cores splice trays support up to 144 cores splice inside and no need special tools for trays fixing or unloading. This type enclosure is available for aerial or wall mount application.

FEATURES:

- Reliable mechanical sealing to prevent liquid or steam penetration
- Easy to open and reopen
- Available 2in 2out and 3in 3out types
- Splice tray capacity: 24cores
- 2 in 2 out type up to 72 cores, 3in 3out type up to 144 cores
- Made by high strength engineering material to against impact or hit

541242402	Premium Line FO Splice Closure, w/6 Cable Ports (3in, 3out), 96 Cores, Dome Type
541262402	Premium Line FO Splice Closure, w/6 Cable Ports (3in, 3out), 144 Cores, Dome Type

Wide Area Network Fiber Optic Inline Type Splice Enclosure

Premium Line fiber optic inline type splice enclosure is in hermetically sealed design, easy for assembly and re-entry. The enclosure is in compact and water-tight design, provides good impact and low temperature resistance for wide applications. Max. 8 x 24 cores splice trays support up to 192 cores splice inside and no need special tools for trays fixing or unloading. This type enclosure is available for aerial duct and direct buried.

FEATURES:

- Comply to IEC 1073-1:1994 test requirements
- Reliable mechanical sealing to prevent liquid or steam penetration
- Easy to open and reopen
- 6 cable entry ports (3in, 3out) for cable diameters of 23 mm(2), 20 mm(2), 16 mm(2)
- Splice tray capacity: 24cores
- Maximum number of splice trays: 8
- Dimension: up to 96cores, 450 x 216 x 110mm; up to 192cores, 450 x 216 x 160 mm
- Suit for areial, duct and direct buried application

Local Area Network 19" Fiber Optic Patch Panel

Premium Line 19" rack mountable fiber optic patch panel is designed for both patching and splicing, accepts whole range of adapters including SC, ST, FC, LC adapters. 2 x Rear cable entries accommodate cables with diameter below 10mm. Inside splice trays stacked and available for 48 cores (for LC) terminated inside, and cable spools with 35mm bending radius guarantee all modes fiber storage inside with additional low bending loss. Individual front adapter plate use screws to fix, easy to assemble and exchange. The metal frame is made by cold rolled steel/1.6 mm, and in 1U finished height.

Fiber Optic Patch Panel

PART NO.	DESCRIPTION
241100002	Premium Line Fiber Optic Patch Panel Main Body, Black
242500002	Blank Panel for Fiber Optic Patch Panel, Black
242302082	8port ST Front Panel for Fiber Optic Patch Panel, Black
242301082	8port SC Front Panel for Fiber Optic Patch Panel, Simplex, Black
243000005	Splice Cassette, for 12-port, Grey

Local Area Network Fully Loaded Adapter Plate

Premium Line provides you fully loaded adapter panel, with whole range of fiber adapter types. The changeable adapter plate design makes sure it can be easily and quickly changed. Saving your time, saving your expenses.

Fully Loaded Adapter Plate

Local Area Network 19" Rack Mounted ODF

Premium Line rack mounted optic distribution frame – ODF suits for standard 19" server cabinet installation. This ODF is available for maximum 96 cores terminated inside with SC or FC connectors & adapters, or 192 cores for LC duplex adapters.

Two simplex adapters stack design make it in easy way for pair coupling distribution in classical fiber network operations. The front door is removable during installation and easily seal with two plastic lockers.

For the cable storage, management and future deployment, the front adapter panel and splice position are all in rotate design, easy for any operations inside.

19" Rack Mounted ODF

PART NO.	DESCRIPTION
245001965	19" Rack Mounted ODF, 96 Cores, w/ Splice Trays, w/o Adapter

Local Area Network Wall Mount Box

Premium Line wall mount fiber optic box is used for the direct termination of fibers. The rear section accommodates cable entry and protects against taking out the cables. Box includes two separate sections for fusion splice trays and for routing optical connecting modules to the equipment.

The Premium Line four-rack space fiber optic enclosure contains all of the features of the two-rack space model, but with additional capacity to manage fiber counts up to 144. Cable entry/exit feature utilizes a flexible grommet seal, which is cut at time of installation to accommodate the desired cable diameters for entry and exit points. These grommets provide a dust & debris barrier during and after installation.

Wall Mount Box

Local Area Network Fiber Optic Patch Panel, MTP/MPO to LC

- FEATURES:**
- Plug and play fiber solution eliminates in-field termination and fusion splice, reduces installation cost and time
 - Fits all standard 19 inch racks, height / port number: 1U / 48 Ports
 - Suitable for MPO/MTP to LC/SC 12port modules(P/N 2470xywz2)
 - Material/thickness of body and adapter panels: cold rolled steel
 - ANSI/TIA 568-D.3 standard
 - RoHS compliant

Fiber Optic Patch Panel

PART NO.	DESCRIPTION
246104482	Premium Line 19" 1U Fiber Optic Patch Panel, 48 Ports, Main Body, Black

Local Area Network Copper & Fiber, Hybrid Patch Panel

Premium Line Hybrid patch panel is specially designed for flexible deployment for a Data Center cabling, it' s a switchable connection way for copper and fiber. This product for 19" rack installation, 24 ports include copper & fiber. 2 interface plates are easily plug in & extract the interface plate, convenient for connector installation. The inside hexagonal bolt is compact design for fiber cable steel member fixing. The fiber plug to install LC duplex quick port jack recommend to use with Premium Line LC duplex adapter & fiber patch cord. The copper plug to install RJ45 keystone jack, recommend to use with Premium Line keystone jack & patch cord.

Copper & Fiber, Hybrid Patch Panel

PART NO.	DESCRIPTION
248100242	Premium Line 1U 19" Copper & Fiber, Hybrid Patch Panel, 24 Ports, No-load, Black

Local Area Network Fiber Optic High Density Patch Panel

Premium Line fiber optic high density unique design patch panel, with maximum LC connecting & cabling, adopt the high-strength environmental light weight material and superior surface treatment technique, which make the panel achieved complete function and various flexible cabling solution.

- FEATURES:**
- 1U/144F LC or 72F SC
 - 2U/288F LC or 144F SC
 - 4U/576F LC or 288F SC
 - Standard 19" Patch Panel
 - Independent plug-in cassette
 - Environmental light weight Aluminum material
 - Front-end cable management
 - Stable adapter structure
 - Compatible with 8F&12F solution
 - Replaceable label and layer remark
 - Duplex and Quad adapter available
 - Various connectors are optional
 - MPO-LC fan out and LC/SC trunk cable
 - Multi-applications in Data center and FTTx

Connectivity Fiber Optic MTP Trunk Cable

Premium Line MTP patch cord connector type upon request, including SC, LC. The patch cord length is according to actual objects.

- FEATURES:**
- Product conforms: IEC61754-7, IEC61754-20
 - Insertion loss conforms: IEC61300-3-4
 - Return loss conforms: IEC61300-3-6
 - Environmentally stable in optical performance
 - Provide total immunity to electrical interference
 - RoHS compliant

 Other length, cable jacket, polarity fiber count, PVC sheath upon request

Connectivity Fiber Optic Patch Cord

Fiber optic patch cords are suited for equipment jumper cable, cross connects, and work area connections. All patch cords are 100% factory tested to ensure performance to ANSI/TIA 568-D.3, ISO 11801:2002 and EN 50173-1 standards. With complete connector range of SC, ST, LC, FC, and also the different mode of fiber cables, consists of various combination for all-field applications.

Patch Cord Characteristics

Mechanical Test	Additional Loss
Mating Durability: Min.1000 times	≤0.1 dB
Cable Retention:100 N, 120 s	≤0.2 dB
Strength of Coupling Mechanism: 40 N, 120 s	≤0.1 dB
Drop Test: 1.5 m, 5 times	≤0.2 dB
Vibration: 10-500Hz, 1.5mm amplitude	≤0.1dB
Temperature Test	Additional Loss
Cold Environment Storage: -40 °C, 96 h	≤0.2 dB
High Temperature Storage: +85 °C, 96 h	≤0.2 dB
Temperature Change: -40 °C ~ +85 °C, 20 Cycles	≤0.2 dB
Damp Heat: +25 °C ~ +65 °C, 93%RH,100 h	≤0.2 dB

FTTX FTTH Distribution Cable

Premium Line outdoor metal free FTTH distribution cable is ideal design for the distribution from main street cabinet or central telecommunication room to ONU (optical network unit) for subscribers' houses or apartment residential buildings. The stranded construction is ideal for ease multiple ONUs distribution and also as a riser cable in the building.

- ITU-G652D fibers in use, OS2 grading after cabled (att. <0.4dB @ 1310nm/1550nm)
- 2 cores per tube design, ideal for FTTx 1:8, 1:16, 2:16 or 2:32 fiber channels distribution
- Double water-proof members, excellent water resistance performance
- User friendly "Dry Core" design, for comfortable and easy installation
- Outer diameter 10.8mm available fits with ODN access holes
- Metal free construction could install with exist utility, like power lines
- MM cores available upon request

2-12CORES, 2CORES PER TUBE

ABOVE 12 CORES, 4CORES PER TUBE

Technical Parameters

Parameter	Units	Value / Details
Fiber Type		ITU-T G652D
Fiber Count		4, 6, 12, 24
Cable Diameter	mm	10.8
Cable Weight	Kg/Km	90
Cable Sheath, Radial	mm	1.8 Nominal
Tensile Strength	N	1000
Bending Radius	Dynamic	≥ 20 x Cable Diameter
	Static	≥ 10 x Cable Diameter
Crush Resistance	N/10 cm	1000
Operational Temperature		-40 to +70 for PE; -20 to +70 for LSOH

FTTH Distribution Cable

PART NO.	DESCRIPTION
264223xxx2	Outdoor metal free stranded FO cable, dry core for FTTx distribution, PE, Black
264222xxx2	Metal Free Stranded FO Cable, Dry Core for FTTx Distribution, LSOH, Black

"xxx" fiber cores, 004/006/008/012/024

FTTX FTTH Distribution Box

The optical network unit to the single house, floor distribution of residence building and upon head power utility installation, always requires compact design, easy installation and operation, as well as weather durable characteristics. Premium Line FTTH distribution box is aim designed for multi-purpose applications in FTTH projects, the dual layer design supports direct termination, and also FTTH distributions via mini splitter built in, available to 1:8, 1:16 and 2:16 distributions with Premium Line FTTH distribution cable. The special designed cable exit fits with FTTH drop flat cable, guarantee the IP grading before and after operations. 4ports, 8ports, 16ports, 24ports, 36ports and 48ports is optional.

Features:

- Main body made by ABS, inner structure made by PC
- Anti-UV and water proof design for both indoor and outdoor uses
- Accommodates splitters and apply to SC simplex adapters
- Additional fix position for outdoor cables
- IP 55 protection level, all weather use

Applications:

- Widely used in FTTH access network
- Telecommunication Networks
- CATV networks
- Local area networks

Operation Condition:

- Temperatures: -40°C – +60°C
- Humidity: 93% at 40°C
- Air Pressure: 62kPa – 101kPa

FTTH Distribution Box

PART NO.	DESCRIPTION
253211xx0	Premium Line FTTH Distribution Box, SC Simplex Type, without Adapters

"xx", 04=4ports; 08=8ports; 16=16ports; 24=24ports; 36=36ports; 48=48ports

Fiber Optic Solution

FTTX FTTH Cable

As the increasing demand on the communication transmission and exchange capacity, traditional copper based access solutions will not comply with the request of high bandwidth and longer distance. Also, with the maturity fiber optic premise network & protocol implementation and developing, like 1G-EPON, 10G-EPON, GPON, the fiber trend is not a far future trend. Fiber to the home (FTTH), the optic fiber directly links the multi-subscribers to the LAN with real high bandwidth provision. As the final access to the subscriber, Premium Line FTTH low bending loss drop flat series cables are aimed design for this high bandwidth network. The excellent optic performance with competitive price is your right choice.

Structure & Environmental Characteristics

Peripheral Strength Member	Material	FRP
	Diameter	0.5 mm

As premises complex corner-bending situation, to conquer and avoid bending loss, Premium Line provides G652D, G657A2 fibers for your option.

FTTX FTTD Wall Box

FTTD- fiber to the desktop, Premium Line featured FTTD wall box is ideal design to support extend FTTH network direct to your desktop!

Features:

- Standard 86x86 size and quality material in use,
- Side adapter position to avoid direct eye contact
- Wall mountable or other surface attach
- Inner cable routing radius over 20mm, good for additional loss control
- 2 side paths for FTTH drop flat cable
- 2 adapter positions

252311021

FTTD Wall Box

PART NO.	DESCRIPTION
252311021	Fiber Optic FTTD Wall Box, 86x86, SC Simplex

FTTX Fiber Optic Faceplate

86x86 Size

Premium Line Fiber optic faceplate is in standard 86x86 design, it's available to secures to any surface, drywall, baseboard, and even modular furniture. It's available 2 types, SC duplex (LC quad), ST dual ports, 45°adapter plug- in/out angle avoid any hurt from light.

Features:

- 100% compatible with standard 86*86 back box
- Adapter can be snapped in and out easily
- Comes with hidden mounting screws and clear outlet ID labels
- Apply UL-94V-0 high-impact, fire-retardant ABS resin
- RoHS complaint

252012021	Fiber Optic ST Simplex Faceplate, 86x86, 2 Port, White

Fiber Optic Solution

Preterminated fiber optic cable

The preterminated fiber optic cable are breakout cables with premounted connectors which allow an easy installation of backbone connections. They are impermeable to splash-water and as an option they can be manufactured with an armor against rodent. The cable consists of 4 or more fiber optic cables. Each single cable has a 900µm coating. A layer of aramid yarn is placed around the core. The cable is completed with an outer sheath made of LSOH or PVC.

The preterminated fiber optic cables are manufactured with an included splitting element which is covered by a black heat-shrinking tube. The cable can be ordered with a pre-terminated pulling eye. Also a cable gland and a fiber-guide can be mounted to the cables on request. The fiber-guide can be screwed direct to a patch panel or splice tray.

Preterminated Pulling Eye (optional):

It prevents the connectors to be damaged during installation in ducts or trays. The pulling eye can be shipped pre-mounted on the cable or for later mounting onto the cable it can be done by the customer itself (depends on the type of the pulling eye).

Pre-mounted pulling eye

self-mounting pulling eye

When using the pulling eye the end of the fiber cables are cascaded. The length differs between 50-80cm. With this cascading the diameter of the pulling eye will be reduced so you can easier install the cable into tubes or trays.

Fiberguide:

Preterminated fiber optic cables can be installed with a splitting element instead of the heat shrinking tube. The advantage by using the fiber guide is that the single fibers can enter the patch panel or splicing tray in a defined way and it is also more robust as the shrinking tube. The fiber guide can be screwed onto most patch panels or splice trays. The fiber guide is available for 12, 24 or 48 fibers. For cables with 24 or 48 fibers the fiber guide is premounted on the cable.
